Pet Care Tip

RECOGNIZING SIGNS OF PAIN IN CATS

It can be very difficult to see that your cat is in pain, as they try to **hide any signs of weakness**.

It is very common for our golden aged cats to have something causing them pain, so it is important to **watch for symptoms**. If your cat is showing any of these signs, it might be time to think about **scheduling an appointment** to help keep your feline friend comfortable.

Patient of the Month!

LEILANI TURNS 1 YEAR OLD ON THE 24TH!

Happy Birthday Leilani

Leilani is a French Bulldog x Boston Terrier mix. Her owner is one of our wonderful assistants, Salah! Leilani is the sweetest and most cuddly girl in the word! She loves playing tug with her brother and sister, Guster Goose and MJ!

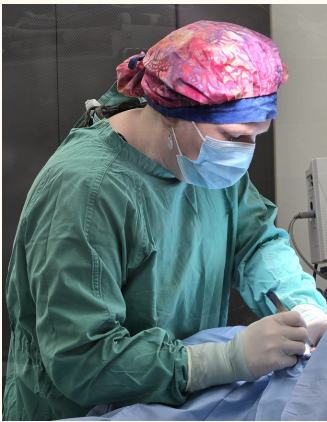

Pet Immunization Awareness Month

We recommend vaccinating your pets to protect them from serious, preventable diseases, support their long-term health, and reduce the spread of illness to other animals.

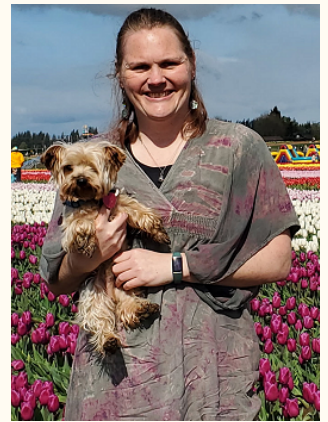

Keeping vaccinations up to date is a simple and effective way to help your pet live a healthier, safer life. Think of vaccines as an investment in your pet's longterm health

Happy
BIRTHDAY
