Seasonal Tip

PET HYDRATION AWARENESS MONTH

June is Pet Hydration Awareness Month, so let's talk about hydration! Cats and dogs are made up of 60–70% water, so staying hydrated is critical for their health. Not getting enough water leads to dehydration, which can cause more problems and even become fatal. Here are concerning symptoms to watch out for and tips to keep your pet hydrated all summer:

Signs of dehydration:

- Drinking less
- Eating less
- Lack of energy
- Panting
- Skin is less elastic
- Gums that are sticky and dry
- Sunken eyes
